+91-8989047460 | Dharamshala, India (Open to Remote Opportunities)

Full Stack Developer with 4 years of experience specializing in JavaScript, React, and Node.js. Passionate about merging design principles with modern web technologies to build scalable, high-performance applications. Successfully launched AI-powered products, optimized UI/UX for engagement, and developed key dashboard solutions for government and private clients.

Technical Skills

JavaScript | Typescript | Next.js | React.js | Node.js | Express.js | Material UI | Tailwind | AntD | Redux | MongoDB | Figma

Work Experience

1. AI Ranger: (<https://airanger.app>):

Dec 2023 - Present

Product Development || UI/UX Design || Front-End Development

- Conceptualized and developed AI Ranger, an AI-powered tool that instantly analyzes children's emotions from photos, providing actionable insights for parents.
- Designed a visually striking, user-centric interface and built using React.js and Tailwind CSS, resulting in increased user engagement and satisfaction.
- Developed key features that transformed the platform into a revenue-generating product, including premium AI tools and subscription models, enabling parents to access advanced insights.
- Managed the full development lifecycle from concept to product launch.

2. Concinnity Media: (<https://gwrms.telangana.gov.in>):

Aug 2023 - Jan 2025

Full Stack Development

- Spearheaded the development of critical dashboards for the Telangana Ground Water Department, enhancing transparency and efficiency in water meter management.
- Developed a comprehensive status tracker for admins, enabling real-time monitoring of applications and streamlining operations.
- Built dashboards using React, Strapi, Zustand and Ant Design for scalable data handling

3. Canvas Space: (<https://canvas.space>):

Jan 2022 - Aug 2023

Full Stack Development

- Managed development from initial concept to final delivery.
- Refactored legacy code and created modular components.
- Integrated Draft.js for editor, Mailchimp for audience connection and Waveusurfer.js for audio interaction.
- Implemented micro-monetisation features for text, images, and audio, resulting in revenue growth for the platform.
- Focused on optimizing app performance to deliver a seamless user experience.

4. Blur Social: (<https://github.com/blursocial>):**Feb 2021 - Dec 2021***Full Stack Development*

- Redesigned user interaction flow to optimize functionality.
- Led development from scratch to beta launch.
- Implemented OAuth, designed and developed APIs.
- Integrated Stripe for payments and customized Quill.js editor with standard editing tools.
- Developed rich features such as Fan Subscriptions, Feed Pages with Infinite Scroll, and Nearby Artist/Fan search.

5. Alt Campus: (<https://altcampus.school>):**Aug 2020 - Jan 2021***Full Stack Development || UI/UX Design*

- Teamed on user-centric design strategy in translation of UX and business requirements into coded solutions.
- Sketched and designed user interactions and the landing page
- Developed APIs and integrated them with modular code.

Education**School of Planning and Architecture, Bhopal, India****2012 - 2017***(Bachelor of Architecture)***Sainik School Gopalganj, Bihar, India****2004 - 2011***(Higher Secondary School Certificate)*
